CI/CD for UdaPeople

CI/CD +

- Our core goal at UdaPeople is to care best for the most valuable resources: the people

- Continuous integration and delivery allows our developers to focus on frequently delivering exciting new features while reducing risk from errors and downtime

- This ensures our long-term revenue growth while keeping risks to a minimum

Increasing revenue with reduced risk are the key benefits of CI/CD

Revenue increase:

- In order to keep our competitive advantage, it is crucial to bring new features quickly to market
- Continuous Delivery ensures a low time to market through gradual roll-out of new features into the market

Risk reduction:

- Automated tests reduce the number of bugs in production
- Continuous Integration allows to automatically test new features for failures and control costs and protect revenue at the same time

Continuous Integration and Continuous Delivery takes UdaPeople to the new level

✓ Our goal is to help small businesses to care for their people

✓ CI/CD enables the developers of UdaPeople to bring in new features to market quickly and reduce risks from errors

✓ This makes UdaPeople a market leader as requirements of clients can be quickly implemented in the product

✓ The approach towards CI/CD will include the establishment of principles such as

1. *Reteable Reliable Processes*
2. *Build-in Quality*
3. *Continuous Improvement*
